Bitcoin L2

Stacks-STX

Mcap:$734M

*Stacks is a Bitcoin Layer for smart contracts; it enables smart contracts and decentralized applications to use Bitcoin as an asset and settle transactions on the Bitcoin blockchain.

Rootstock Infrastructure Framework-RIF

Mcap:$81M

*RIF offers open-source, decentralized tools and technologies that make it easy to build accessible DeFi products.

02
Product

Products

UBI(Phase1)
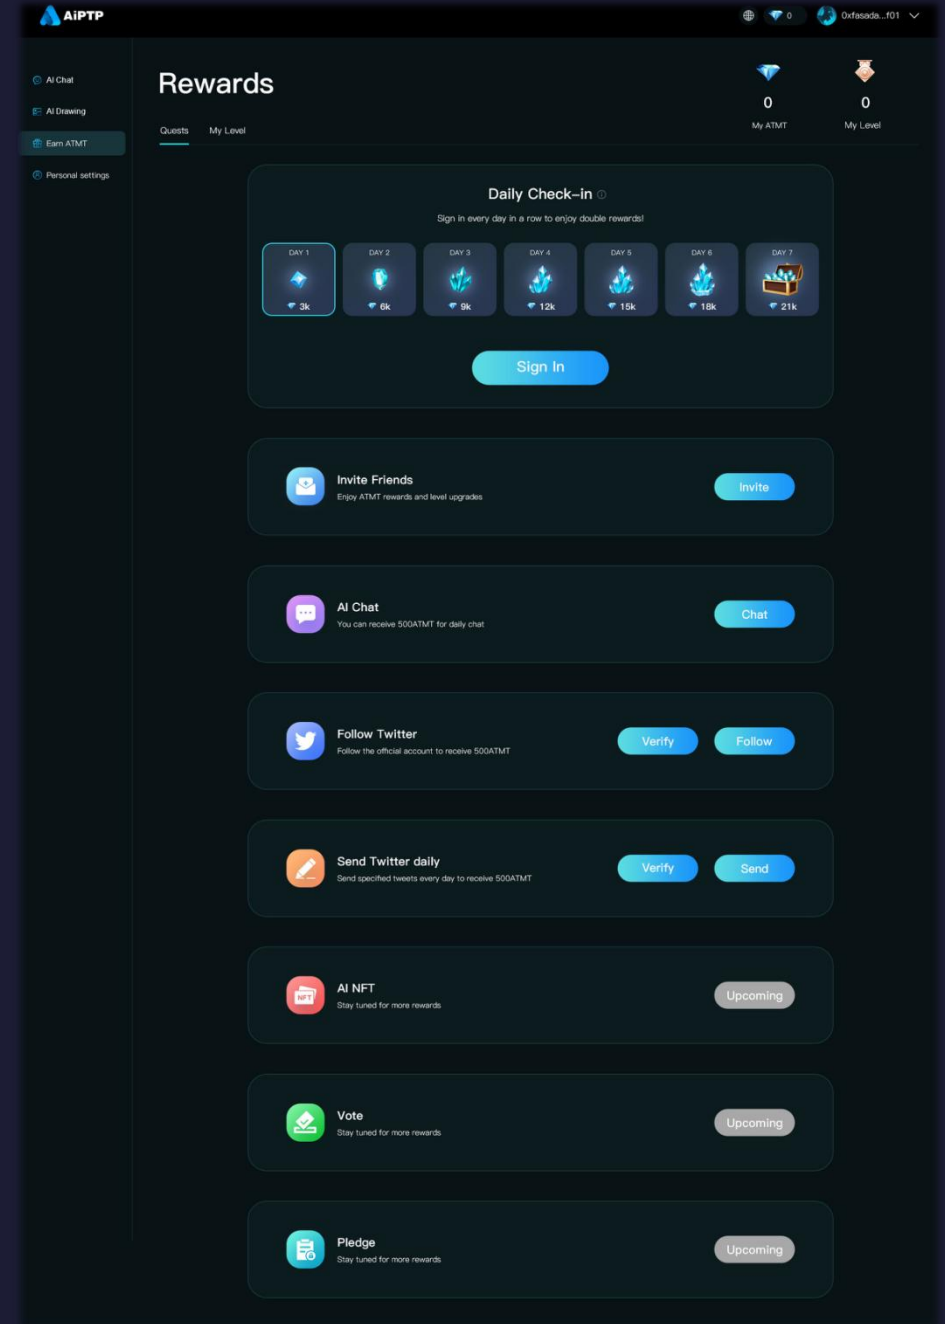

Universal Basic Income

AI Chat(Phase1)

ask everything you want to know.
based on Openai open source Model

AI Drawing(Phase1)

Be an artist right now.
based on Stable Diffusion open source Model

Products

Staking(Phase1)

Stake $ATMT to get vATMT to vote for project development.

Voting(Phase1)

Use vATMT to vote on snapshot

Bitcoin L2 Mainnet(Phase2)

Suppport smart contract development

AI Mining(Phase2)

Use graphic cards to mining on AiPTP Bitcoin L2

$ATMT Tokenomics

AIPTP.com

Total supply:1.997 T
Burned:199.7 B(10%)

*All ATMT Tokens will
be mapped to the AiPTP
Bitcoin L2 mainnet with
the ratio of 100:1

|			
Foundation	10%		Used for eco-development, grants incentives, developer community rewards, and hackathon bonuses. Linear unlocking after 6 months, 1/36 per month
Team & Adviser	7%		For team expenses and consulting fees. 1/36 of a month unlocked linearly after 1 year
Marketing	6%		For community incentives, partners. 10% unlocked after listing, 1/12 per month for the rest
Seed Sale	10%		10% unlocked by listing, 9% unlocked by remaining monthly
Public Sale	20%		20% unlock at TGE,10% unlocked monthly.
UBI	16%		Dynamic release of 3% in the first year (the AI algorithm model of AIPTP counts the first 72 hours of user activity and the number of $UBI issued to dynamically adjust the output in the subsequent period), 2% in the second year, 1% in the third year, and 0.1% per year thereafter
Intial Liq.	25%		100% add to Uniswap at once
Market-making	5%		For CEX listing, market making. 3-month lock-up period, followed by 10% linear unlocking every month thereafter.
BRC20	1%		Will have a special airdrop to holders after ERC20 launched.

06
Advantage

AI + Crypto

AI+crypto is a bold attempt. At present, the AI industry is monopolized by large companies such as Microsoft and Google. Decentralizing AI and using the characteristics of crypto may be able to break through the encirclement.

Bitcoin Layer 2

- The market size of Bitcoin is larger. As of today, $BTC market cap accounts for 45% of the entire cryptocurrency market
- Bitcoin is the most decentralized cryptocurrency project. The founder is missing, and all data on the chain is maintained by miners and nodes.
- #Bitcoin L2 has fewer competitors. As a start-up project, if technology and marketing cooperate well, there is a greater probability of winning
- Bitcoin L2 has more room to grow. All current ETH L2 is about 5% of ETH market cap, but what about Bitcoin L2? It seems to be only 1%.

THANKS.
